

Showcase presentation

for designing online course
presentations with Markdown & MARP

(It can be so easy)

Content types

Headings, Text, Lists, etc.

1 Text types

This is normal text in *cursive* and **bold**

You can use headings to structure your slides:

This is a H1 in *cursive* and bold

This is a H2 in *cursive* and bold

This is a H3 in *cursive* and bold

This is a H4 in *cursive* and bold

H5 and H6 are used mainly for image captions

This is a H5 in *cursive* and bold

This is a H6 in *cursive* and bold

1 Text Types

in Markdown language:

```
This is normal text in *cursive* and **bold**
```

```
# This is a H1 in *cursive* and **bold**
```

```
## This is a H2 in *cursive* and **bold**
```

```
### This is a H3 in *cursive* and **bold**
```

```
#### This is a H4 in *cursive* and **bold**
```

```
##### This is a H5 in *cursive* and **bold**
```

```
##### This is a H6 in *cursive* and **bold**
```

```
This is how you do an empty line: <br><br>
```

Attention, please

you can fit headlines to grab the attention of your students

How to do that with Markdown:

```
# <!-- fit --> Attention, <br> please
```

2 Lists

You can do Bullet Point Lists:

- List
- List
 - another Point

You can also do numbered Lists:

1. List Point
 - 1.1. another point
2. Point

2 Lists

in Markdown language:

You can do Bullet Point Lists:

- List
- List
 - another Point

You can also do numbered Lists:

1. List Point
 - 1.1. another point
2. Point

3 Quotes

»Abgeschieden wohnen sie in
Buchstabhausen an der Küste
des Semantik, eines großen
Sprachozeans.«

– Author Name (2025)

How to do that with Markdown:

```
> »Abgeschieden wohnen sie in Buchstabhausen an der Küste <br>  
des Semantik, eines großen Sprachozeans.«  
## – Author Name (2025)
```

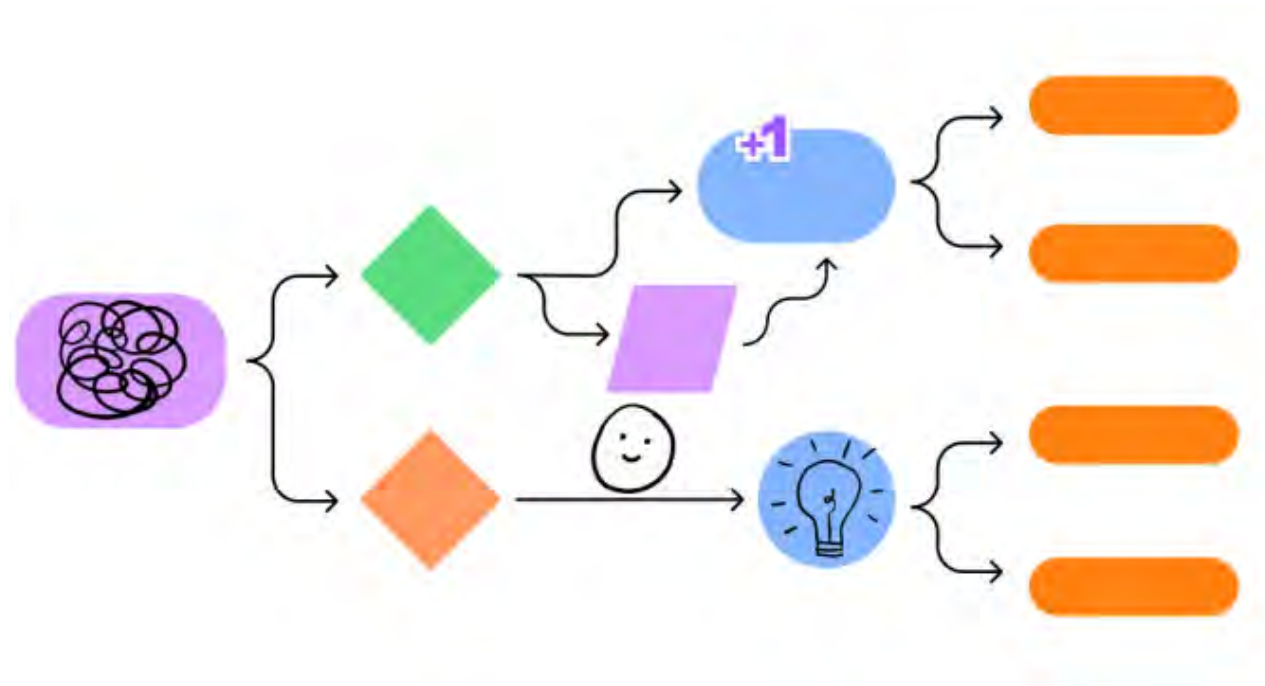

4 Tables

ID	Syntax	Description	Another Category
1	Header	Title	Value Number 1
2	Paragraph	Text	Second Value
3	Quote	Text	Value 3

How to do that with Markdown:

```
| ID | Syntax | Description | Another Category |
| --- | --- | --- | --- |
| 1 | Header | Title | Value Number 1 |
| 2 | Paragraph | Text | Second Value |
| 3 | Quote | Text | Value 3 |
```

5 Images

This is the image caption

© This is the Copyright

5 Images

in Markdown language:

```
![Image](img/grafik-beispiel.jpg)
```

```
##### **This is the image caption** <br> © This is the Copyright
```

6 Other content types

Links:

I'm an inline-style link

Math:

$$s^2 = \frac{\sum (x_i - \bar{x})^2}{n - 1}$$

Code snippets:

```
s = "Python syntax highlighting"  
print s
```

5 Other content types

in Markdown language:

Links:

```
[I'm an inline-style link](https://www.google.com)
```

Math:

```
$$ s^2 = \frac{\sum (x_i - \bar{x})^2}{n-1} $$
```

Code:

```
```python  
s = "Python syntax highlighting"
print s```
```

# Classes

for title pages, fullscreen images, text sizing etc.

## What are classes

Classes change the styling of elements to look a certain way. You can apply these to the slide by adding this code snippet before the slide content:

```
<!-- _class: nameofclass -->
```

You can also add multiple classes like this:

```
<!-- _class: firstclass secondclass -->
```

## Types of classes

### Slide design

classname	What it does
<b>titlepage</b>	with petrol background and special headings; <i>only use this once</i>
<b>structural</b>	for structural slides like intro, chapters, etc.
<b>fullscreen</b>	renders fullscreen image with special caption styling
<b>img_right</b>	renders image on the right side with special caption styling
<b>end</b>	aligns elements at the end of the slide

## Types of classes

### Element alignment

At default all elements are aligned at the top of the slide.  
There may be use cases, when you want other options.  
Then you can use these classes:

classname	What it does
<b>end</b>	aligns elements at the end of the slide
<b>center</b>	aligns elements from the center of the slide

## Types of classes

### Text sizing

This is the default text size, but if you have content, which is a little longer you can change the text size by using these classes:

classname	What it does
<b>tiny-text</b>	changes font size of text, lists, links and tables, please avoid using this class regularly
<b>small-text</b>	changes font size of text, lists, links
<b>large-text</b>	changes font size of text, lists, links and H1

# Examples

use cases to copy

# The Title

titlepage with center class

Only use *titlepage* once in your presentation

## This is a structure slide

- you could structure and list your learning outcomes here
  - or you could use it for chapters
  - students will automatically notice that content changes when they see this type of slide
- so do not use it just to have a dark background**

Only titlepages and structure slides show the header with the module name and the unit title.

## Presentation content

This is a **content** slide. This is always white.

*Please do not use the chapter slides for content*

### Types of content you can put here:

- text, lists etc.
- images
- tables
- quotes
- code snippets
- mathematical expressions

When you use the class *fullscreen*, the image caption will automatically look like this. This is a H5. **Here could be a copyright**

You could do another caption, if you want. This is a H6.

## Class *img-right*

Here you could put text or lists,  
or tables

**!! Please be aware that your avatar/your  
film-you will overlap with the image**

The image caption is placed here  
© Copyright

**»Abgeschieden wohnen sie in  
Buchstabhausen an der Küste  
des Semantik, eines großen  
Sprachozeans.«**

This is a quote with the *end* class.  
The quote will sit on the end of the slide.

## Case Study 1

### **img-right and small-text**

Far far away, behind the word mountains, far from the countries Vokalia and Consonantia, there live the blind texts. Separated they live in Bookmarksgrove right at the coast of the Semantics, a large language ocean. A small river named Duden flows by their place and supplies it with the necessary regelialia.

It is a paradisematic country, in which roasted parts of sentences fly into your mouth. Even the all-powerful Pointing has no control about the blind texts it is an almost unorthographic life.
